We follow agile methodology to Work in Ativa

Agile methodology is a popular approach for development process in Ativa. The Agile meth focuses on delivering any work in short, iterative cycles, with a focus on collaboration, flexibility, and customer satisfaction. Here are the steps involved in using Agile for development Process:

01
DEFINE SCOPE & CREATE BACKLOG

We do define the scope of project. Identify the features and functionalities that are essential for app, and prioritize them based on their importance to your users. After that we create a product backlog that includes all the features and functionalities that you want to include in Project, then we Prioritize the features based on their importance and the value they bring to users.

02
SPRINT PLANNING & EXECUTION

Then Planning for sprints by breaking down the product backlog into smaller tasks that can be completed in a sprint. Each sprint should be focused on delivering a specific set of features that are agreed upon by the development team. During the sprint, the development team works on the tasks that were identified in the sprint planning phase. The team have daily stand-up meetings to discuss progress and identify any roadblocks.

03
SPRINT REVIEW & RETROESPECTIVE

At the end of each sprint, the development team have a sprint review meeting with stakeholders to showcase the features that were completed during the sprint. This provides an opportunity for stakeholders to provide feedback and make any necessary changes to the app. After each sprint, the development team retrospective meeting to discuss what went well, what could be improved, and any changes that should be made to the process.

04
REPEAT

We continue the cycle of sprint planning, execution, review, and retrospective until all the features and functionalities have been developed and tested.

Team

ATIVA

Disha Thakkar
Founder & CEO

Founder & CEO of Ativa is very much appreciated not just for her huge figuring out on specialized intricacies, yet in addition for persistently exhibiting greatness. Her commitment towards the work, her enthusiasm to learn and embrace new things in her day-to-day existence and in her association have taken this organization to the new levels. She never let any of her representative work in trouble, she generally makes great energies and change the air of the functioning spot at whatever point she noticed on her every meeting, calls, or online meetings.
